EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

- In line 1 of claim 2, after the word "The", replace the word "apparatus" with the word – device –.
- In line 1 of claim 3, after the word "The", replace the word "apparatus" with the word – device –.
- In line 1 of claim 4, after the word "The", replace the word "apparatus" with the word – device –.
- In line 1 of claim 5, after the word "The", replace the word "apparatus" with the word – device –.
- In line 1 of claim 6, after the word "The", replace the word "apparatus" with the word – device –.

This amendment has been performed based on the fact that the preamble of claim 1 discloses an image capturing "device". Included within the image capturing device is a focusable lens "apparatus". Clearly, the limitations found in claim 2 are not directed towards the focusable lens apparatus, but are additional limitations of the device as claimed in the preamble.

Art Unit: 2612

Thus the amendment has been performed to clear up any confusion as to what the limitations of claims 2-6 are drawn.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

3. Claims 1-27 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Regarding *claim 1*, the primary reason for allowance is that the prior art fails to teach or reasonably suggest an electronically actuatable shutter device comprising a plurality of individually addressable and actuatable shutter elements, and a processor for controlling a focus depth of the lens apparatus and selectively actuating particular shutter elements of the shutter device associated with each of a plurality of focus depths during image capture.

As for *claim 7*, the primary reason for allowance is that the prior art fails to teach or reasonably suggest a still camera comprising a shutter device with individually addressable and actuatable shutter elements, which is operated by the method of capturing a first image at a first focus depth comprising a first subset of pixels, wherein the first subset of pixels is associated with a first subset of shutter elements, and obtaining a second image at a second focus depth, wherein the second subset of pixels is associated with a second subset of shutter elements, wherein the first and second subset of shutter elements are different from each other.

With regard to *claim 13*, the primary reason for allowance is that the prior art fails to teach or reasonably suggest a method for capturing a still image comprising the steps of accepting a first and second object designation corresponding to first and second object of an image, capturing a first image by exposing a first subset of pixels wherein the first image

Art Unit: 2612

includes an image of the first object, capturing a second image by exposing a second subset of pixel elements wherein the second image includes an image of the second object, and wherein the first subset of pixels is different than the second subset of pixels.

Regarding *claim 21*, the primary reason for allowance is that the prior art fails to teach or reasonably suggest accepting object designations of one or more objects, initiating an image capture in an image sensor, capturing a first object image by exposing a first subset of pixel elements, capturing a second object image by exposing a second subset of pixel elements, wherein the accepting step comprises designating a grouping of shutter elements substantially corresponding to an object.

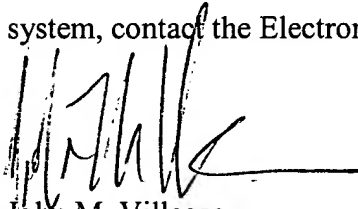

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John M. Villecco whose telephone number is (571) 272-7319. The examiner can normally be reached on Monday-Friday.
